Saturday 13 th November 2021	Dr. Paresh Vasani	9:55–10:40am EST 3:55–4:40pm CET 7:25–8:10pm IST	Use of Synergy Software in Pediatric Cases
Saturday 13 th November 2021	Anne Schadde	10:40–12pm EST 4:40–6:00pm CET 8:10–9:30pm IST	Homeopathic Treatment of Children in the Period of their Development
Sunday 14 th November 2021	Dr. Dinesh Chauhan	8:30–10am EST 2:30–4:00pm CET 6:00–7:30pm IST	Child-centric Designers Approach
Joint academy presentation		10:05–10:25am EST 4:05–4:25pm CET 7:35–7:55pm IST	
Sunday 14 th November 2021	Dr. Rajan Sankaran	10:30–12pm EST 4:30–6:00pm CET 8:00–9:30pm IST	Super-classes in Children

Jürgen Weiland, MSc Hom

Title: *Desperation and Anxiety Disorders during Corona Lockdown*

Jürgen Weiland has practiced homeopathy in Bonn, Germany since 1992. He is currently the President of WISH, the Worldwide Institute for Sensation Homeopathy. Mr. Weiland has been teaching for many years and holds national and international seminars. In addition, he regularly holds study groups for midwives, as well as supervision groups for homeopaths. His involvement with issues concerning birth and his extensive clinical experience in this field particularly influenced his understanding of the Materia medica. Mr. Weiland's plant photography has given him a profound insight into the plant kingdom which he shares in his seminars, using striking images to bring home his ideas. You can find his plant pictures and information on plant families at www.pflanzenportraits.com.

With its profound impact, the Corona pandemic has also changed our pediatric practices. Limited social ties can affect the natural development of children of all ages. Instead of the normal flu-like infections, mental disorders showed up more frequently during the lockdown. If one succeeds in translating the inner reaction pattern to the global crisis into the appropriate homeopathic remedy, many effects can be mitigated. Using anxiety disorders and childhood depression as examples, Jürgen Weiland will present cases from various kingdoms.

Dr. Heiner Frei

Title: *Scope of Polarity Analysis in Pediatric Cases*

Dr. Heiner Frei (Switzerland) is a pediatric consultant who served many years as a senior physician at the Bern University Children's Hospital before concentrating in 1987 on his large pediatric practice. He is widely known for his research publications on methodology and case analysis according to Boenninghausen. He has written *Polarity Analysis in Homœopathy: A precise path to the simillimum* and *Homœopathy and ADHD: A new treatment concept with polarity analysis*.

Dr. Annette Sneevliet

Title: *Homeopathic Treatment for Behavioural Problems in Children*

Dr. Annette Sneevliet graduated as a medical doctor from University Nijmegen in 1986. She studied homeopathy with many great teachers, including Geukens, Vithoulkas, Zaren, Mangialavori, Scholten, and Sankaran. She is an internationally known homeopath who has been teaching and practicing homeopathy for the last 30 years. She practices the Sensation Method and has given lectures in the United States, New Zealand, Scotland, London, Germany and Slovakia. She has an established homeopathic practice and also teaches at the School for Homeopathy in the Netherlands. She is known for her ability to find the simillimum in new and innovative ways.

It is not easy to find sensation in children's cases. Sometimes it is also difficult to get hints about the kingdoms. Through the concept of evolution, Dr. Sneevliet will help attendees understand and distinguish between the known remedies for the behavioural problems in children. Dr. Sneevliet will be sharing cases from her practice.

Dr. Resie Moonen

Title: *Problems with Immunity in Children and Recovery with Lanthanides*

Dr. Resie Moonen is a Homeopathic Medical Doctor and General Practitioner with more than 35 years of experience. She is a respected teacher in Homeopathy and Integrative Medicine and gives seminars all over the world. Her seminars are in Dutch, English, German or French. Topics include complementary medicine (Maastricht University), and homeopathy during all stages of life: pregnancy, birth, childhood, respiratory problems, female problems, auto-immune diseases, older people, and palliative care. She also gives seminars about plant families and the periodic table, especially about the use of Lanthanides, and the stages in the periodic table and in plant families.

In the last few years we have seen a surge of auto-immune conditions in the pediatric population, leading to serious disturbances in quality of life (and also of their parents). During this lecture, Dr. Moonen will show how Lanthanides can be

successfully used in the treatment of auto-immune conditions in children, with understanding of the specific characteristics and patterns of this group. She will demonstrate with cases that have long-term follow-ups, and give careful explanations of the exact choice of remedy in each case.

Dr. Paresh Vasani

Title: *Use of Synergy Homeopathic Software in Pediatric Cases*

Dr. Paresh Vasani is a well-known speaker, teacher and mentor. He has developed a reputation for his immense patience and calmness. Treating scores of patients in India and abroad has given him excellent insights into the science and art of homeopathy. He is an excellent supervisor of case-taking, in this way helping other homeopaths achieve depth of understanding and accurate prescribing. He has taught in India, Israel, Japan, S. Korea, USA, Romania and his students recognize and appreciate his clarity of concepts and simplicity in teaching. He is also the main force behind developing Vital Quest (the homeopathic software based on Dr. Rajan Sankaran's Sensation Method) and Synergy Homeopathic Software (SHS), formerly known as MacRepertory and ReferenceWorks.

Dr. Vasani will be speaking on "Hidden Secrets of Using Homeopathic Software," and will reveal his secrets in using SHS. He will give valuable tips on how to analyse cases by using some important features of this software.

Anne Schadde

Title: *Homeopathic Treatment of Children in the Period of their Development*

Anne Schadde began to practice homeopathy and psychotherapy in Munich, Germany in 1986. She was one of the founders of the Homeopathy Forum in Gauting, Munich and the European & International Councils for Classical Homeopathy, and she teaches in Germany and other countries. She has conducted homeopathic provings of Ozone, Lithium carbonicum, Cypraea eglantina (Cowrie-Shell), Lignum aquilaria agallocha (a scented wood), Ginkgo biloba, some of the

provings are published in *Listening to Stone, Wood and Shell* and *Seven Tourmalines of the Rainbow; A homeopathic study with case samples*.

Homeopathic treatment and accompaniment of children on their way through childhood, school years and adolescence is an important part of our daily practice. The path is development and unfolding. Like a seed, the child's vitality unfolds in time and space. The goal of man, his potential, is spiritual and individual. In the sensory perceptions lives the whole consciousness of the earth (The Other Song). Therefore, homeopathy is the ideal form of therapy. The child, a spiritual being with a body formed by heredity, reveals itself to us slowly in the course of development. Knowledge of the mental/spiritual development of children is helpful in homeopathic prescribing.

In her presentation, Ms. Schadde will show how the history of each time of the disease can be traced back to the initial history of the child. Through the unfolding of the personality, the themes of life become visible.

Dr. Dinesh Chauhan

Title: *Child-centric Designers Approach*

Dr. Dinesh Chauhan is one of the most influential figures in homeopathy from Mumbai, India. He has lectured in more than 25 countries worldwide and is the author of three books for homeopaths and a laymen's book for pediatric holistic homeopathy: *From treating to transforming: Choose homeopathy, a designer approach for your child*.

He is the founder of Athatho Brahma Jigyasa Trust and is on the panel at the other song, Mumbai. He pioneered the concept of a patient-centric scientifically intuitive Case Witnessing process. New revolutionary concepts include a) Right-brained approach in the Case Witnessing process and life, b) An integrative holistic approach using the plant kingdom, and c) Bringing the simillimum principle outside of the consulting room and into an individual's day to day life.

His presentation will cover:

- 1) How to manage the 'new normal' pandemic situation and illnesses around it with the Holistic Integrative approach and a potential Case Witnessing space.
- 2) The unique child-centric diary (during Case Witnessing, during treatment and after treatment).

- a) A guided questionnaire that will help to give a clear picture of the child's whole design.
 - b) The possibility to give individualistic child-centric advice with the help of a child-centric diary.
- 3) Treating and transforming children with the Case Witnessing process using unique artistic methods to explore their cases; making children aware of their whole altered diseased pattern/design to help them heal themselves.

Dr. Rajan Sankaran

Title: *Super-classes in Children*

Dr. Rajan Sankaran, MD (Hom), is an internationally renowned thinker, teacher and writer of the homeopathic system of medicine from Mumbai (India). He graduated from the CMP Homeopathic Medical College in Mumbai where he was later associate professor for 25 years.

Dr. Sankaran is best known for his innovative concepts in homeopathy. His understanding of disease as a delusion—followed by his discovery of newer miasms, classification of diseased states into kingdoms (viz. plant, mineral and animal) and the seven levels of experience—brought clarity into understanding diseased states.

He strongly advocates to encompass and integrate the old, classical and traditional approaches with the latest advances.

Dr Sankaran's research and extensive clinical practice also led to the formulation of the WISE (Witnessing Inner Song Experience) processes, which are used in homeopathic case-taking and also in health workshops for the larger community. Dr Sankaran has written 22 books, many of which are translated into several international languages, and his methods were the inspiration for the Vital Quest software program. He heads the other song—International Academy of Advanced Homeopathy, in Mumbai.

The recent concept of super-classes has been a great help in locating the remedy for the patient. It is a bit like an atlas which helps to point out the continent where the remedy is found. After we locate that, we can then locate the kingdom / remedy with greater precision.

This talk will explore how to use the concept of super-classes in children's cases. Illustrated with a case, the presentation will throw light on the six super-classes, demonstrating how we can identify them, especially in children, and how we can use them to help find the remedy.
